PREPARING FOR WAR.

A war with Spain is not only possible, but probable. During the past week the Administration and Cabinet have not been idle. Preparations for war, in case diplomacy fails to secure peace, have been made, and Congress is sustaining the Administration almost as one man. A bill, authorizing two new regular artillery regiments, passed the House Monday with only three negative votes, Messrs. Cox, Jones and Todd. On Wednesday another more important measure passed the House. This was a bill appropriating $50,000,000 to fight Spain, if that country declares war. The appropriation was passed without a dissenting vote amidst great enthusiasm.

Preparations during the entire week point to war, and every evidence of preparing for war, or any other nation it must be fully prepared. It was also shown that the President will be vigorously supported in his course by the present Congress, and the dignity of the nation will be preserved.

The President has also dispatched Captain Brownson to England, with instructions to purchase, if possible, two war ships, if any desirable vessels can be obtained. It is understood that the United States has been offered several magnificent cruisers which would materially strengthen our navy.
